

Unmatched Connectivity Integration Expertise
Purpose | Speed | SimplicitySM

THE DSI VISION

Through shared purpose and a true passion for aviation, DSI aims to do away with the traditional, overly complicated ways of doing business.

We will always provide our customers, partners, and team members with the greatest value by embracing the beauty of simplicity and by placing sustained organizational adaptability as a matter of paramount importance.

CONNECTIVITY & MISSION SYSTEMS

The DSI Team brings to market an unmatched portfolio of integration experience stemming from well over 2000 system installations across the majority of military commercial derivative aircraft types in operation today. The following lists some of the key systems types our team has integration expertise with:

- ISR, SAR, Weapons Systems
- Ka, Ku, S, & L Band Satellite Connectivity(BLOS)
- Air to Ground Connectivity

Our aircraft integration teams' experience covers all major OEMs of commercial derivative aircraft including but not limited to:

- Airbus
- Boeing
- Embraer
- Textron

OUR APPROACH

While DSI is headquartered in Florida's "Space Coast", our network and operational reach is truly GLOBAL.

Through utilizing experienced and agile, mobile teams, and through strong collaboration with various national Civil Aviation Authorities, we are expanding on our proven model to deliver high quality service directly to the customer's site of choice.

Our unique operations model allows us to develop tailored solutions for each customer to reduce aircraft ground time and increase operational readiness.
